1. *What is the purpose of the study?*
The purpose of the study is to investigate the effect of the use of a mobile learning application on the learning outcomes of students in a mathematics course.

2. *What are the research objectives?*
The research objectives are to determine the effect of the use of a mobile learning application on the learning outcomes of students in a mathematics course, to determine the effect of the use of a mobile learning application on the learning outcomes of students in a mathematics course, and to determine the effect of the use of a mobile learning application on the learning outcomes of students in a mathematics course.

3. *What are the research questions?*
The research questions are: (1) What is the effect of the use of a mobile learning application on the learning outcomes of students in a mathematics course? (2) What is the effect of the use of a mobile learning application on the learning outcomes of students in a mathematics course? (3) What is the effect of the use of a mobile learning application on the learning outcomes of students in a mathematics course?

4. *What are the research hypotheses?*
The research hypotheses are: (1) The use of a mobile learning application will have a positive effect on the learning outcomes of students in a mathematics course. (2) The use of a mobile learning application will have a positive effect on the learning outcomes of students in a mathematics course. (3) The use of a mobile learning application will have a positive effect on the learning outcomes of students in a mathematics course.

5. *What are the research methods?*
The research methods are: (1) Quantitative research method. (2) Qualitative research method. (3) Mixed research method.

6. *What are the research results?*
The research results are: (1) The use of a mobile learning application has a positive effect on the learning outcomes of students in a mathematics course. (2) The use of a mobile learning application has a positive effect on the learning outcomes of students in a mathematics course. (3) The use of a mobile learning application has a positive effect on the learning outcomes of students in a mathematics course.

7. *What are the research conclusions?*
The research conclusions are: (1) The use of a mobile learning application has a positive effect on the learning outcomes of students in a mathematics course. (2) The use of a mobile learning application has a positive effect on the learning outcomes of students in a mathematics course. (3) The use of a mobile learning application has a positive effect on the learning outcomes of students in a mathematics course.

8. *What are the research recommendations?*
The research recommendations are: (1) The use of a mobile learning application should be encouraged in the learning process. (2) The use of a mobile learning application should be encouraged in the learning process. (3) The use of a mobile learning application should be encouraged in the learning process.

Two similar approaches have been taken that have not resulted in the same success. The first approach, taken by the U.S. Environmental Protection Agency, was to use a single, broad-based indicator of environmental quality, the Environmental Quality Index (EQI), to assess the overall health of the environment. The second approach, taken by the World Bank, was to use a set of indicators to assess the health of the environment, but to use a single, broad-based indicator to assess the overall health of the environment.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.
