

30040

1. The first part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1) as $t \rightarrow \infty$. It is shown that the solutions of the system (1) are bounded and tend to zero as $t \rightarrow \infty$.

Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses was significantly higher than the number of incorrect responses in all cases. The number of correct responses was significantly higher than the number of incorrect responses in all cases. The number of correct responses was significantly higher than the number of incorrect responses in all cases.

Figure 1. The effect of the number of nodes on the number of iterations required to reach the optimal solution. The number of iterations required to reach the optimal solution increases as the number of nodes increases. The number of iterations required to reach the optimal solution is approximately 1000 for 10 nodes, 2000 for 20 nodes, 4000 for 40 nodes, 8000 for 80 nodes, 16000 for 160 nodes, and 32000 for 320 nodes.
