BEFORE THE BOARD OF COUNTY COMMISSIONERS

In and For the County of Klamath, State of Oregon

In the Matter of the Application)
for Zone Change No. 75-13) ORDER
by JOHN G. FELDMANN)

THIS MATTER came on for hearing upon the application of JOHN G. FELDMANN for a Zone Change from Residential-Agriculture (RA) to SP-16 (Planned Unit Development) by the Klamath County Planning Commission, for real property more particularly described in Exhibit "A", attached hereto and incorporated by reference herein. A public hearing on said application having been regularly held on November 25, 1975 before the Board of County Commissioners and it appearing to said Board of Commissioners from the testimony, reports and information produced at said hearing by the applicant, the Planning Commission and the Planning Department that the application should be granted.

The Board of Commissioners makes the following Findings of Fact and Conclusions of Law as required by Ordinance No. 17, the Klamath County Zoning Ordinance:

FINDINGS OF FACT:

1. Applicant owns a parcel of real property consisting of approximately 6.8 acres which is irregularly shaped. It lies to the east of Summers Lane, near Denver Avenue. Property to the north and west consist of single family dwellings. Property to the west is bordered by a drainage ditch; to the southwest is Stearns school; directly south to the property, single family dwellings exist; to the east of the property across Summers Lane between Winter and Denver Avenues exist C-5 commercial structures; to the east of the property between Onyx and Denver Avenue are single family dwellings.

2. The applicant seeks a Zone Change upon the property in order to construct a planned unit development consisting of multiple family dwellings, and would conform to the setback requirements of the SP-16 zone. Denver approaches and ends at the western boundary of the subject property.

3. Present use of the property appears to be for pasture land. The property further contains a vacant house, garage and a small shed.

1299

4. Applicant seeks the zone change on the subject property in order to construct a planned unit development consisting of multiple family dwellings, conforming to the setback requirements of the SP-16 zone, to be generally located on the westerly portion of the property. Applicant contemplates construction of approximately 30 units consisting of four-plexes and six-plexes and that the development would conform to the property development standards of the SP-16 zone. Applicant also proposed before the Klamath County Planning Commission of use of the front portion of the property for the Commercial - Professional designation.

5. Sewer Service will be provided to the property by the South Suburban Sanitary District. Water is available from the Oregon Water corporation. However, a prior developer of the property had previously withdrawn a request for a change of zone on the parcel citing difficulty in obtaining water service. Soil and topographical conditions appear adequate to provide drainage of the property.

6. Access to the property will be provided by Summers Lane, a major arterial, and Derby Street which will be extended to the subject property.

7. Applicant states that there is need for additional multiple family dwellings in the area, by inspecting the newspapers and talking to real estate agents in the area, Mr. Tuter, Mr. Ganong and Mr. Stillwell. Mr. Feldman further states that since purchasing the property in 1970, he has received 15 phone calls in Mt. Vernon, Washington from people wanting to rent the vacant house currently on the premises because they were unable to find a suitable place to live.

8. Applicant states that by the widening of Summers Lane a traffic problem caused by increased use of the property would not exist.

at the hearing was not complete and did not represent applicant's intended use of the property for the Commercial-Professional designation.

CONCLUSIONS OF LAW:

1. The property affected by the Change of Zone is adequate in size and shape to facilitate those uses normally allowed in conjunction with such Comprehensive Land Use Plan designation in that the Lot size is approximately 6.8 acres and the appropriate required acreage needed is 5 acres.

1300

2. The property affected by the zone change is properly related to streets, highways, namely Denver and Summers Lane to adequately serve the type of traffic generated by the intended multiple family dwellings and the type of traffic generated by such uses.

3. The proposed zone change would have no adverse effect upon any property or the permitted uses thereof within the affected area as shown from a lack of adverse testimony in this matter.

4. The proposed zone change is in keeping with land uses and improvements, trends in land development, density of land development and prospective needs for development in the affected area.

5. The proposed zone change does in effect represent the highest, best and most appropriate use of land and is in keeping with the intended purpose of ORS 215.055.

NOW, THEREFORE, IT IS HEREBY ORDERED that the application of JOHN G. FELDMANN for a change of zone from Residential-Agriculture (RA) to SP-16 (Planned Unit Development) on a parcel of real property more particularly described in Exhibit "A", attached hereto and by reference incorporated herein, is hereby granted and approved, subject to the following:

1. That the use of the premises be and is hereby restricted to SP-16 (Planned Unit Development) to meet the setbacks and requirements within the context of the SP-16 zone.

2. That the applicant will reapply for a conditional use permit if at such time the applicant desires to use part of the property for a commercial development.

DONE and DATED this 27th day of January, 1976.
