State of Oregon  
DEPARTMENT OF ENVIRONMENTAL QUALITY

Vol. <sup>m</sup> 78 Page 9323

**CERTIFICATE  
OF FAVORABLE SITE EVALUATION FOR  
INDIVIDUAL SUBSURFACE SEWAGE DISPOSAL SYSTEM**

(Not a permit for construction)

This is to certify that the following described property

Tax Lot 133

Section 15, Township 34, Range 7

has been evaluated on May 25, 1976 and found to be approvable for the installation of one subsurface sewage disposal system in accordance with ORS 454.605 through 454.755 and administrative rules of the Environmental Quality Commission promulgated thereunder.

This approval is given on the basis that the lot or parcel described above will not be further partitioned or subdivided and that conditions on subject or adjacent properties have not been altered in any manner which would prohibit issuance of a permit under the statutes and rules noted above. Any such subdivision, partitioning or alteration voids this certificate.

The subsurface sewage disposal system is to be located on the above-described property as follows:

1. The apparent textural class is pumice.
2. The depth to a restrictive layer is at 60 inches of the ground surface.
3. A minimum setback of 100 feet from the well is required for the drainfield area.
4. With these soil conditions 50 lineal feet of drainfield line will be required per bedroom for a total of 100 lineal feet.
5. A construction permit must be obtained from this office prior to installation.

A system to be located anywhere on the lot or parcel other than as described above will require an additional site evaluation along with an additional fee.

This certification is valid until a subsurface sewage disposal system is installed pursuant to a permit obtained from Klamath Branch Office or until earlier cancellation, pursuant to Commission rules, with written notice thereof by the Department of Environmental Quality to the then owners according to Department records or the county tax records, whichever are more current. Subject to the foregoing, this certification runs with the land and will automatically benefit subsequent owners of the land.
