The primary goal of the study was to determine the effect of the treatment on the level of the dependent variable. The results of the study are presented in Table 1. The data show that the treatment had a significant effect on the dependent variable, $F(1, 10) = 10.0, p < .05$. The mean score for the control group was 5.0, while the mean score for the treatment group was 6.0. This indicates that the treatment had a positive effect on the dependent variable.
