THIS MATTER came before the Assistant Hearings Officer, JAMES R. UERLINGS, on December 6, 1984, and January 3, 1985.

The Assistant Hearings Officer heard testimony from the applicant and several witnesses in opposition to the matter.

The principal concern of the opponents was in the area of surface run-off caused by the grading and paving of the subject property and from concern regarding the high water table in the area.

A letter was submitted, Exhibit "E", from the Health Department, indicating that, at this time, a permit could not be granted for the installation of a septic system on the property. The Hearings Officer advised the applicant that, as the record stood at this point, a conditional use permit could not be granted until a resolution was made of the drain-off problem and the septic system problem in association with the high water table.

The applicant requested that the Assistant Hearings Officer grant an indefinite continuance until such time as
