Iocations along border of the claim where the readings were taken - location notice posts

A. Nature, extent, and cost of the survey.

The nature of the geophysical survey was an examination of the relative isotopic readings of radioactive AU. The extent of the work involved an examination of the readings of the isotope machine along the Southern border of the claims on a West to East basis. The readings were taken about every 160 feet from the West end of the claims to the East end of the claims. The cost of the survey greatly exceeded \$200.00.

B. Location of the work performed.

The locations where the readings were taken are depicted on the map above. They can be seen in relation to both the claim borders and the location monuments.

C. Basic findings of the survey.

The findings of the survey are listed below in the West to East sequence. The main dial basis was set at 500 and the gross sensitivity meter was set at 5. These readings show relative indications of isotopic AU that are present and are a positive indication of mineralization.

P meter	Isotopes	P meter	Isotopes
1 n 50	30-57	9 n60	30-42
2 n 50 - /	30 - 57	10 n40	27-50
3 n40	29-50	11 n40	26-49
4 n 30	30-47	12 n 50	22-46
5 n60	28-40	13 n30	27-48
6 n60	28-40	14 n20	22-50
7 n40	19-42	. 1 <i>5</i> n 30	25-46
8 n 50	29-41	사람은 사람이 있는 것은 것이 있다. 가운 것이 가지 같은 것이 있는 것이 가지 않는 것이 있는 것이 같이 있다.

## D. The survey examiners.

The survey was conducted by Robert Shoemaker (8005 220th S.W. Edmonds, Wash. 98020) and Jeffrey Hall (P.O. Box 17185 Salem, Oregon 97305). Mr. Shoemaker is considered one of the foremost professionals in the use and interpretation of the AU isotope unit, and has extensive experience as a professional in its use. Mr. Hall documented the results and prepared this report. He has been involved professionally in mining for the past 5 years.
