27 Sec. 36 ec.35 L ш a m.C mazo \sim claims 7 T 29 S Ð 18 17 /27 16 28 25 ziu 30 臼 eek Z 13 15 14 21 20 ec:/ BM locations along border of the claims where the readings

were taken

A. Nature, extent, and cost of the survey.

The nature of the geophysical survey was an examination of the relative isotopic readings of radioactive AU. The extent of the work involved an examination of the readings of the isotope machine along the Northern border of claims 24,25,28, and 29 on a West to East basis. The readings were taken about every 160 feet from the West end of the claims to the East end of the claims. The cost of the survey totaled \$1900.00.

B. Location of the work performed.

The locations where the readings were taken are depicted on the map above. They can be seen in relation to the claims' borders. Because these claims are contiguous the work performed on these claims applies to the whole claim group as shown above.

16428

C. Basic findings of the survey.

The findings of the survey are listed below in the West to East sequence. The main dial basis was set at 500 and the gross sensitivity meter was set at 5. These readings show relative indications of isotopic AU that are present and are a positive indication of mineralization.

	Pmeter	lsotopes	P meter	Isotopes
1	n <i>5</i> 0	30-57	9 n60	30-42
2	n 50	30-57 1	0 n40	27-50
