

To Whom It May Concern:

- A. The claims listed and identified below are those claims concerning which this "Notice of Intent to Hold Claims" is being filed. They are listed by their ORMC serial numbers and the corresponding names as listed on the BLM microfiche;
- B. There is no change in the mailing address of the claimants;
- C. All the claims listed have been claimed and are being held by the owners for the valuable mineral contained therein;
- D. The owners of said claims intend to continue development of the claims;
- E. The reason that neither the annual assessment work has been performed nor a corresponding affidavit of assessment work filed on said claims, is that they were located during the 1987-1988 assessment year; specifically, between September 1 (12 noon), 1987 and December 31, 1987. Said claims are thus exempted from the assessment work requirements for that assessment year, and this Notice of Intent to Hold Claims is being filed in lieu thereof.
