Surface mining will not be permitted. Any other mining or extraction shall be conducted in a manner having only limited, localized impact on the natural values of the property, and may not be irretrievably destructive of significant conservation interests. These restrictions on access to and mining and/or extraction of the minerals reserved hereunder are intended to be enforceable in perpetuity against Grantor, its successors and any other transferees of the reserved mineral rights. Grantee agrees that although drilling for gas and oil and underground mining on the property may have some temporary localized impact, such activities generally will not interfere with the overall conservation purpose of this conveyance so long as conducted consistently with applicable laws and regulations relating to protection of natural values.

Before exercising any of its reserved rights in a manner which might have an adverse impact on the conservation interests associated with this conveyance, Grantor or its successor must notify Grantee or its successor. Grantee or its successor may inspect the property and any mineral extraction operations associated with it to determine if there is compliance with the terms of this conveyance and may enforce the conservation restrictions by appropriate legal proceeding, including suits to require restoration of the property to a condition consistent with such restrictions.
