## NOTICE

Each certificate enclosed confirms the water right established under the terms of a permit or transfer order issued by this department. The water right is now appurtenant to the specific place where the use was established as described by the certificate. The owner of the land is the owner of the water right. Oregon law does not allow the Director to reissue a certificate because of a change in the ownership.

The water right is limited to a specific amount of water, but not more than can be beneficially used for the purposes stated within the certificate. The water must be controlled and not wasted. To change the location of the point of diversion, the character of use, or the location of use requires the advance approval of the Water Resources Director.

If any portion of this water right is not used for five or more consecutive years, that portion would be forfeited by the nonuse. However, land enrolled in a Federal Reserve Program is not subject to forfeiture during the period of enrollment. A water right may also be forfeited by any intentional act by the owner that would cause the water right to be unusable. For example, the land irrigated under the water right is made nonirrigable by covering it with pavement or buildings.
