The review criteria of Section 44.030 of the Land Development Code requires that:

- A. The use complies with policies of the Comprehensive Plan.

As the requested use is a conditionally permitted use within the RS zone as adopted as part of the Comprehensive Plan, applicant is in compliance with this criterion.

- B. The use is in conformance with all other required standards and criteria

The RS zone allows as a conditional use, an additional dwelling if the lot or parcel size is greater than 20,000 square feet. The applicant meets this requirement as the parcel is approximately one acre in size and the appropriate CUP application was made.

- C. The location, size, design, and operating characteristics of the proposed use will not have a significant adverse impact on the livability, value or appropriate development of abutting properties and the surrounding area.

The parcel is of sufficient size to support the proposed dwelling. The proposed dwelling is a new doublewide manufactured home which meets the standard of manufactured home placement within the UGB. No comment was received from any of the notified property owners in contrary of review criteria C.
