COMPREHENSIVE PLAN FINDINGS

The annexation conforms to the Comprehensive Plan according to the following facts:

1. There are no viable agricultural lands on the properties.
2. There are no forestlands on the properties.
3. The annexation will provide additional commercial land for development that can be served by a full array of urban services in an area that is already designated for concentrated commercial development and activities, thereby assisting in the preservation of open space and natural resource areas.
4. The annexation will permit the applicant to connect to the City's water system, providing a source of potable water for the business operation and eliminating the need to extract ground water on site.
5. The property in question is not located in a natural disaster or hazard zone.
6. The annexation will allow development of a new medical facility that will contribute to the health and well being of its clients, improving their ability to recreate. The annexed property will also contribute to future improvements and development of the City sidewalk system.
7. The annexation will increase the City's tax base through an increase in real and personal property tax revenue in addition to generating funds through water system development charges and income through ongoing water fees.
8. The use of the annexed land will be strictly non-residential but the annexation of land within the UGB further supports the need for smart growth instead of developing land outside the UGB for housing.
9. The land is adjacent to other land within the City limits and to City services, so it is logical to expand these services to the property.
10. The annexed property will contribute a fair and proportionate share toward development of the City transportation system at the time that a Local Improvement District is formed to construct Crosby Avenue to City urban standards.
11. The annexation will add more commercial land that is adjacent to existing commercial lands, thereby increasing available commercial land and uses in close proximity to each other, which can serve to reduce the travel distance from one commercial activity to another and conserve vehicular fuels and emissions.
12. The land is essentially surrounded by City land that has been developed for commercial and office uses and is therefore appropriate for similar urban uses.
